

UH-MF-50 – high shoe covers

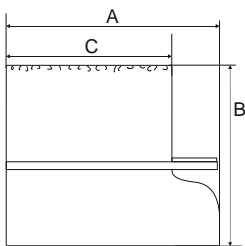

1. PRODUCT DESCRIPTION.

The UH-MF-50 shoe covers is made of MF material (laminated microporous film) with an antistatic finish on both sides. Under certain conditions, the covers can be used as a protective bowl to dissipate electrostatic charges. Designed to protect sensitive processes from contamination and, under the provisions of the PPE Directive on personal protective equipment, as a category I product, they are used to protect against the effects of non-hazardous dust and liquids in low risk applications of those parts of the body that are covered through the covers.
